Our Story

RV Astley's story begins in 1971, when Ronald Victor Astley, an ambitious auctioneer with an eye for opportunity, embarked on a new chapter by trading giftware from his home in North Birmingham. What started as the vision of one determined individual, swiftly flourished into a partnership between father and son. With a dedication to excellence and a passion for growth, the company evolved, relocating to larger premises and transitioning from giftware to the world of interior lighting and furnishings. Over the decades, RV Astley has proudly collaborated with a remarkable array of clients across the retail, design, and hospitality sectors. These partnerships have been instrumental in shaping our identity, and ensuring our offerings remain both relevant and inspiring.

As a strategic partner, Astley Zhongshan is at the heart of RV Astley's R&D and manufacturing. With design led processes dedicated to quality and innovation, our factory has opened its doors to direct-to-factory sales and delivery. Whether ordering from the catalogue, website, or working together to develop new items exclusively for you, Astley Zhongshan remains committed to pushing the boundaries of design and delivering exceptional service, from initial concept to the final product.

The Sophies are a lovely new addition to our natural stone offerings. Due to natural variations in the marble, we've grouped the finishes into light, dark, and mixed. Please be aware that each lamp is a unique combination of tones and will inherently differ from the photos.

Flexible Solutions

OEM - Your Brand, Our Expertise

We understand that your brand is your identity. Our OEM service allows you to bring your designs to life with the support of our supply network and in-house manufacturing capabilities. From concept to completion, we work closely with you to ensure your products meet your exact specifications while upholding your highest quality standards.

ODM - Our Designs, Your Success

For businesses seeking original, market ready designs, our ODM service offers a range of exclusive lighting collections created by our experienced designers. Drawing inspiration from both European design traditions and contemporary trends, we craft lighting solutions that stand out. Customisation options ensure our designs align perfectly with your brand's identity and market demands.

OBM - Our Brand, Your Lighting Solution

In addition to OEM and ODM services, we proudly present our own brand, Redhouse Studio. As an OBM partner, you can access our signature range of decorative lighting products, designed in-house, The Redhouse Studio collection showcases the best of European design infused with global craftsmanship, offering a perfect choice for retailers and distributors seeking high-quality, ready-to-market lighting

Testing

Our lighting conforms to European and UK regulations as standard, with other testing available as required. Our team works closely with accredited testing laboratories to ensure your products meet the necessary compliance for your target markets.
